DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. Claims 1-17 recite the limitation "Wet-chemical-prepared calcined composition modified barium titanate powder composed of oxide constituents of barium (Ba), calcium (Ca), titanium (Ti), zirconium (Zr), manganese (Mn), Yttrium (Y), and neodymium (Nd), forming a single phase solid solution...". This limitation comprises new matter since applicants' originally filed specification provides no support for a modified barium titanate powder (metal oxide particle) composed of a barium titanate with all of these metals constituent oxides together.

5. Claim 17 recites the limitation "An electrical energy unit recited in claim 1 that due to the double coating of the composition modified barium titanate powder and the hot-isostatic-pressing process allowed the relative permittivity of 29,480 with an applied voltage of 3500 V to

Art Unit: 1775

dielectric thickness of 12.7 ~~microns~~ ^{microns} to be achieved which characteristic is retained over the lower to the upper temperature limits of a commercial product". This claim constitutes new matter.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claims 1-17 are indefinite since the first 3 bullet points in claim 1 are not method steps, but rather materials. It is unclear how they relate to the claimed fabrication method. For instance, does applicant intend to claim that the first and second uniform coatings are applied or coated on to the wet prepared modified barium titanate powder? If so, it should be expressly claimed.

9. Claim 15 recites the limitation "An electrical-energy-storage unit as recited in claim 1 that can supply electrical energy to portable electronic devices, for example, as computers, radios, television sets, cameras, refrigerators, phones, lights, and other such devices" and claim 16 recites "An electrical-energy-storage unit as recited in claim 1 that can supply electrical energy to remote devices, for example, as microwave repeaters, phones, traffic signals, recreational equipment, lighting systems, camping equipment, farming equipment, and other such devices". The limitation "for example" makes the claims indefinite because it is unclear if the limitations after "for example" are meant to limit the claim.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1775

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
